

KNUTRI[®]

TRIAL LOCATION

AURORA, SD

Soybean · R1 foliar application

YIELD RESPONSE

TRIAL RESULTS

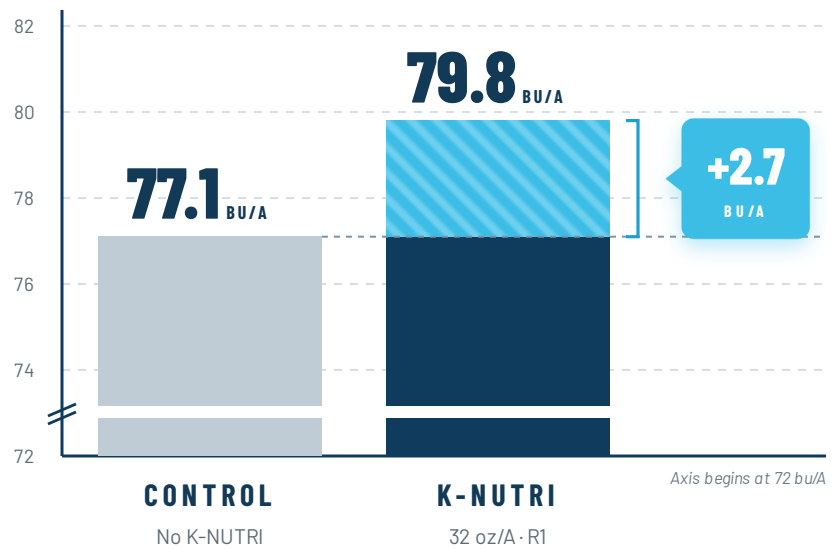

+2.7

BU/A yield advantage

+3.5% OVER CONTROL

A single foliar pass of **K-NUTRI** at R1 lifted soybean yield from **77.1** to **79.8 bu/A**—putting mobile potassium and chelated micros to work as pods set and seeds fill.

POTASSIUM NUTRITION, MORE THAN A FOLIAR

WHY **K** NUTRI[®]

IMPROVES PLANT HEALTH

Supports physiological function and grain, fruit & tuber fill.

ENHANCES NUTRIENT UPTAKE

Proprietary bioactive material and chelation improve foliar penetration & efficiency.

BUILDS STRESS RESILIENCE

Chelated Zn, Mn, B & Mo build tolerance at key stages.

OPTIMIZES WATER REGULATION

Supports stomatal function & water movement under stress.

PRODUCT AT A GLANCE

QUALITY INGREDIENTS. REAL RESULTS.

Guaranteed N-P-K **0-0-15**

K source **Potassium Acetate**

Micronutrients **Zn · Mn · B · Mo**

Use rate **32 oz/A**

Formulation **Liquid · Foliar**
